Lot 33 Elizabeth Pl Proston

Beautiful house in the country Mechano steel framed home Was a two bedroom and we have enclosed the front veranda in to make it a sunroom another bedroom or you could easily turn it into a four bedroom by adding a additional wall. Has reverse cycle air cons keeping it warm in winter and cool in summer....it was built in 2011 and is council approved to lock up stage. All the plumbing has passed council and it's just the building needs its final inspection once its completed. We just have few finishing touches to do and painting the new walls that have just been plastered. Has nice big solar system which reduces your power bill by alot. Has a large 3 bay shed which is council approved and is fully powered. Its located just out of Proston with school and shops close by. Also close to the Boondomba dam. This was our little dream home but unfortunately due to ill health

we need to be closer to sunshine coast hospital.
